Volume 51, January - February

Eng./Russ.

Mathematics

Formulas in the Inverse Problem for the Kinetic Equation

Yu. E. Anikonov

1 5

Coercive Solvability of a Generalized Nonlinear Cauchy-Riemann System

K. Kh. Boimatov and G. Dzhangibekov

3 8

Definability in Hereditarily Finite Manifolds

Yu. L. Ershov

8 12

Higher Order Difference Operators' Spectra Characteristics and the Convergence of the Joint Rational Approximations

V. A. Kalyagin

11 15

Estimates of the Jost Solution to a One-Dimensional Schrödinger Equation with a Singular Potential

V. V. Katrakhov and S. M. Sitnik

14 18

On a Jumping-Nonlinearity Integral Equation Corresponding to Nuclear Interactions

V. P. Maslov

17 21

On Spectral Expansions of Functions from H_p^α for a Differential Operator with a Singularity at the Surface

V. S. Serov

22 26

Inequalities for Bessel Functions

S. M. Sitnik

25 29

Second-Order Convergence of an Algorithm Calculating the Value of Linear Differential Games

G. E. Ivanov and E. S. Polovinkin

29 151

The First Initial Boundary Value Problem for Evolution Equations Generated by Symmetric Functions of Principal Curvatures

N. M. Ivochkina and O. A. Ladyzhenskaya

33 155

Three Series of 3-Manifolds and Their Fundamental Groups

A. C. Kim and A. I. Kostrikin

36 158

Extremal Properties of Solutions to Inverse Boundary Value Problems

A. V. Kiselev

39 161

Multivalent Differentiation and Integration by Quasiaffine Mappings

D. B. Šilin

42 164

Explicit Calculation of Effective Moduli for Composites Reinforced by an Irregular System of Fibres

N. S. Bakhvalov and M. E. Eglit

46 295

Brownian Motion with Absorption in a Clusterized Random Medium

L. V. Bogachev and Yu. A. Makhnovskii

51 300

Ordinal Envelopes of Vector Lattices

E. Yu. Emel'yanov

54 303

L. V. Bogachev and Yu. A. Makhnovskii

51 300

Ordinal Envelopes of Vector Lattices

E. Yu. Emel'yanov

54 303

Constructing Lyapunov Functions for Evaluating Attractor Domains <i>V. A. Kamenetskii</i>	56	305
Metric Relations in Integer-Valued Linear Programming <i>N. N. Kuzurin</i>	59	308
A New Criterion of Quasitriangular Decomposability of a Differential System <i>A. K. Lopatin and S. P. Belkina</i>	61	311
Decomposition of Sets Equipped with a Structure into a Free Sum and a Direct Product <i>Yu. N. Pavlovskii</i>	64	314
A Note on the Jorgens-Calabi-Pogorelov Theorem <i>V. G. Tkachev</i>	67	317
A Nearly-Optimal Transfixing Set <i>A. E. Andreev</i>	69	453
Exact Formulas for the General Solution to the Equation $\varepsilon^3 \frac{d^4 y}{ds^4} - \frac{d}{ds} \left(s \frac{dy}{ds} \right) - \omega^2 y = 0$ <i>I. L. Barskii</i>	72	456
Solvability "as a Whole" for the Initial Boundary Value Problem for Compressible Viscous Liquid Flow Equations with Low Reynolds Numbers <i>V. A. Vaigant and A. V. Kazhihov</i>	76	460
On the R. A. Sack Theorem for Translation Operators <i>O. V. Viskov</i>	79	463
Methods of Topological Dynamics in the Uniform Local Controllability Problem <i>A. G. Ivanov and E. L. Tonkov</i>	83	467
Diagonal Regularizers in Problems of Elasticity Theory <i>A. N. Kononov</i>	86	470
Oscillation Properties of Solutions to Functional Differential Equations <i>R. G. Koplatadze</i>	89	473
Bases of Wavelets and Linear Operators in Anisotropic Lizorkin-Triebel Spaces <i>M. Z. Berkolaiko and I. Ya. Novikov</i>	92	583
Asymptotics of the Solution to the Dirichlet Problem for Elliptic Equations <i>V. N. Denisov</i>	95	587
Iterative Methods in Problems of the Theory of Elasticity <i>A. N. Kononov</i>	97	589
Method of Least Errors for Skew-Symmetric Systems <i>N. E. Mikhailovskii</i>	100	592
Some Inverse Problems for Parabolic Equations <i>E. G. Savateev</i>	102	595
Anomalies in Spectral Asymptotics <i>M. M. Skriganov</i>	104	597
Exponential Ray Transformation on a Riemann Manifold <i>V. A. Sharafutdinov</i>	107	600
Iterative Solver for Mixed Problems with Quasilinear Elliptic Equations in Intricately Shaped Regions <i>K. Yu. Bogachev</i>	109	727
Extremal Sequences with Forbidden Sums <i>V. A. Gurvich</i>	113	731
Asymptotics of the Cauchy Problem for Thermal Conductivity Equation for Large Solution Time <i>V. N. Denisov</i>	117	736

Some New Aspects of the Theory of Stability of Conformal Mappings <i>A. P. Kopylov</i>	120	739
Interpolation in the Space of Entire Functions of Given Growth and Its Asymptotics <i>A. S. Krivosheev</i>	124	743
Existence in the Large in Time of Classical Solutions to the Initial Boundary Value Problem for the Marger-Vlasov Equations in the Nonlinear Theory of Sloping Shell Oscillations <i>V. I. Sedenko</i>	126	745
The Complexity of Finite Graphs <i>A. V. Chashkin</i>	129	748
Temperature Fields in a Double-Layer Hollow Cylinder with a Semi-Infinite Slit along the Interface <i>I. F. Obraztsov, B. V. Nerubailo, and L. G. Smirnov</i>	132	33

Mathematical Physics

A Simplified Wave Model of Turbulent Velocity Fluctuations in Viscous Shear Fluid Flows <i>V. G. Priimak and T. Miyazaki</i>	136	319
Asymptotics of the Solution to the Mixed Problem for the Kinetic Equation of Neutron Transport <i>V. V. Kucherenko</i>	142	476
On the Asymptotic Representation of Surface Waves in the Form of Two Travelling Burgers Waves <i>P. I. Naumkin and I. A. Shishmarev</i>	146	602

Informatics

Algorithm for the Calculation of Vector Magnitude for EKG Recorded from Six Standard and Six Precardial Leads <i>V. F. Kravchenko, A. Yu. Popov, and V. I. Pustovoi</i>	151	607
--	-----	-----

Control Theory

Controllability and Stabilizability of a Nonlinear Dynamical System <i>A. M. Kovalev</i>	154	168
Robust Stability of Relay Control Systems <i>Yu. Z. Tsypkin</i>	156	751

Volume 51, March - April

Mathematics

Certain Problems in the Theory of Fractional-Order Linear Differential Operators <i>T. S. Aleroev</i>	159	5
Multiplicators of Fourier Integrals and Estimates of Mixed Derivatives for Banach-Valued Functions <i>V. S. Guliev</i>	161	7
Certain Problems Arising from Rubel's Problem of Simultaneous Approximation <i>A. A. Danielyan</i>	164	10
Functions That Stabilize Themselves to Solutions to Homogeneous Linear Differential Equations <i>P. A. Zharov</i>	166	17

A New Form of Equations of Motion in Celestial Mechanics <i>V. I. Zubov</i>	169	13
How To Establish a Boundary Value Problem for the Class of Loaded Partial Differential Equations of the Mixed-Parabolic Type <i>Ilhan Öztürk</i>	173	20
Removal of the Singularities of Integrable <i>CR</i> -Functions Lying in the Hölder Peak Sets <i>A. M. Kytmanov and C. Rea</i>	175	22
Extension of Solutions in Domains with Piecewise-Analytic Boundaries <i>T. V. Savina, B. Yu. Sternin, and V. E. Shatalov</i>	177	24
Iterative Regularization of the Monotonic Operator Equations of the First Kind in Partially Ordered Spaces <i>V.V. Vasin</i>	180	151
Symmetries of Nonlinear Controllable Systems <i>A. N. Kanatnikov and A. P. Krishchenko</i>	184	155
Relaxation Cycles of a Nonlinear Wave Equation That Is Smoothly Dependent on Parameters <i>A. Yu. Kolesov</i>	187	158
Describing the Space of the Riesz β -Potentials $\mathbb{U}_{\alpha}^{\gamma}(L_p^{\gamma})$ Using B -Derivatives of Order $2[\alpha/2]$ <i>L. N. Lyakhov</i>	190	161
Fractional Powers of Klein-Gordon-Fok Operators in L_p -Spaces <i>V. A. Nogin and E. V. Sukhinin</i>	194	166
Stability Estimates for an Inverse Problem for the Transfer Equation <i>V. G. Romanov</i>	197	169
Feller Semigroups for Multidimensional Diffusion Processes <i>A. L. Skubachevskii</i>	200	173
Fractional Powers of Second-Order Differential Operators with Constant Coefficients in L_p Spaces <i>A. V. Abramyan and V. A. Nogin</i>	204	295
Differential Properties of Manifolds with an Intrinsic Metric <i>Yu. F. Borisov</i>	208	299
Growth Order $o(\log \log n)$ of Partial Sums of the Fourier-Stieltjes Series of Random Measures <i>G. A. Karagulyan</i>	210	301
Sublinear Extension and Averaging Operators <i>Yu. E. Linke</i>	212	303
The Schwarz Potential and Singularities of Solutions to the Branching Cauchy Problem <i>B. Yu. Sternin, H. S. Shapiro, and V. E. Shatalov</i>	215	307
A New Space of Potentials with Densities from the Stepanov Class <i>D. U. Umbetzhonov</i>	218	310
Weakly Contact Transforms and the Change of Variables on Nilpotent Groups <i>S. K. Vodop'yanov and A. D. Ukhlov</i>	221	439
Critical Sets and Unimodal Maps of a Square <i>V. A. Dobrynskii</i>	224	442

Behavior at Infinity of Solutions to One Class of Nonlinear Elliptic Equations in a Tube Domain <i>V. A. Kondrat'ev and O. A. Oleinik</i>	227	446
Boundedness of the Multiplicities for the Systems of Generalized Exponents That Are Uniformly Minimal in L_2 <i>L. V. Kritskov</i>	231	450
A Guaranteed Result in the Quasilinear Differential Game <i>A. A. Chikrii and I. S. Rappoport</i>	233	452
Harmonic Properties of the Module of a Family of Curves and Invariant Metrics in Teichmüller Space <i>A. Yu. Vasil'ev</i>	237	583
<i>A priori</i> Estimates of Solutions to Two Problems for the Generalized Parabolic-Hyperbolic Heat Equation <i>N. Yu. Kapustin</i>	239	585
Capacities of Sets and Imbedding Theorems for Ideal Spaces <i>V. S. Klimov</i>	242	588
Asymptotics of the Fundamental Solution to a High-Order Parabolic Equation <i>E. F. Lelikova</i>	244	590
Probabilistic Representations for Systems of Elliptic Equations <i>K. K. Sabel'fel'd</i>	247	594
Asymptotics of Dirichlet's Kernel for Spherical Means <i>A. A. Yudin</i>	251	598
Integral Representation of a CR-Function and Its Holomorphic Continuation <i>Sh. Yarmukhamedov</i>	253	600
Completeness of Solutions to a Differential Equation with a Deviating Argument That Is Majorized by Exponential Functions <i>L. A. Beklaryan and M. G. Shmul'yan</i>	256	727
Operator Doubles and Semigroups of Mappings into Groups <i>V. M. Bukhshtaber</i>	260	731
Stabilization of Solutions to Differential Equations in a Hilbert Space <i>M. L. Gorbachuk, A. N. Kochubei, and A. Ya. Shklyar</i>	263	734
Parseval Type Equalities and Some of Their Applications <i>V. V. Zhuk and O. L. Vinogradov</i>	265	737
Unique Solvability in the Class L_2 of the Tricomi Problem with a Nonlocal Condition on the Line of Change of Type for a Model Parabolic-Hyperbolic Equation <i>N. Yu. Kapustin</i>	268	740
Methods of Constructing Generalized B -Splines and Their Properties <i>B. I. Kvasov</i>	271	744

Mathematical Physics

Exact Solution to the Equation for the Attenuation Coefficient of an Electromagnetic Wave over a Surface with a Special Form of Impedance <i>V. F. Kravchenko and L. A. Pazynin</i>	276	177
Electromagnetic Wave Propagation over a Surface of Variable Impedance of the Special Kind <i>V. F. Kravchenko and L. A. Pazynin</i>	279	313

Corner Catastrophes and Uniform Asymptotics

A. S. Kryukovskii, D. S. Lukin, and E. A. Palkin 283 456

Quaternion-Valued Integral Representations
of the Harmonic Electromagnetic and Spinor Fields

V. V. Kravchenko 287 603

InformaticsEstimation of the Convergence of the Mathematical Expectation of the Probability
of the Classification Error for the Averaged Strategy

N. G. Startseva 290 606

Control Theory

A Class of Local Variational Problems with a Degenerate Nonlinear Integrand

A. P. Afanas'ev 294 317

Strategic Description of Social Choice

V. S. Levchenkov 297 320

A Class of Local Variational Problems with an Arbitrary Degeneration in the Goal Function

A. P. Afanas'ev 301 460

Robust Stability of a Class of Distributed-Parameter Systems

Ya. Z. Tsypkin and B. T. Polyak 304 463

Numerical Criteria of Robustness of Nonlinear Systems with Parameter Uncertainty

A. M. Kerbelev 307 749

Volume 51, May - June**Mathematics**

Algorithmic Approach to Dynamic Information Theory

M. S. Burgin 311 7

A Fast Block Method for Solving the Laplace Equation
on Polygons with Nonlocal Boundary Conditions

E. A. Volkov 314 11

Inversion of the Lyapunov Central Limit Theorem

V. I. Zubov 318 15

Theory of Nonlinear Partial Differential Equations of the Korteweg-De Vries Type

M. I. Imanaliev, P. S. Pankov, and T. M. Imanaliev 320 17

Smoothness of Solutions to the Generalized Dirichlet Problem and the Eigenvalue Problem
for Differential Operators Generated by Noncoercive Bilinear Forms

S. A. Iskhokov 323 20

Asymptotics of Neumann Problem Eigenvalues in a "Dense Comb" Type Domain

T. A. Mel'nik and S. A. Nazarov 326 23

Symmetries of Linear Partial Differential Equations and Fundamental Solutions

A. V. Aksenov 329 151

Discrete Analogs of Classes of Continuous Functions with Different Smoothness

G. G. Amanzhaev 332 154

Dipole Orientation Distribution in Lattices

I. V. Ermilov 337 159

Solvability of the Dirichlet Problem for the Maximum Surfaces Equation
with Singularities in Unbounded Domains

A. A. Klyachin 340 162

Systems of Exponents with a Separable Real Spectrum That Are Complete Minimal, but Not Uniformly Minimal in $L^{\bar{p}}$ <i>A. M. Sedletskii</i>	343	165
Justification of the Quasi-Averaged Equations of One-Dimensional Motion of a Viscous Barotropic Medium with Rapidly Oscillating Properties <i>A. A. Amosov and A. A. Zlotnik</i>	345	295
Computing Fixed Points of Extremal Mappings <i>A. S. Antipin</i>	350	300
Aleksandrov Spaces of Curvature That Are Bounded Above <i>V. N. Berestovskii</i>	353	304
Toeplitz Operators Whose Symbols Have Discontinuities of the Infinite Index Type <i>S. M. Grudskii</i>	356	307
Some Function Classes in Fourier Series <i>T. Sh. Tevzadze</i>	359	310
A Difference Scheme for the Discontinuity Decomposition Problem in the Case of Burgers' Viscous Equation <i>G. I. Shishkin</i>	362	313
Generators in General Classes of Weighted Spaces of Holomorphic Functions <i>A. V. Abanin</i>	367	439
The Gauss Process Generated by the Levy Laplacian and the Corresponding Feynman-Kac Formula <i>L. Accardi and O. G. Smolyanov</i>	370	442
Absolute Convergence of Spectral Expansions <i>Sh. A. Alimov</i>	374	446
Plane Sets and Nonlinear Boundary Value Problems <i>S. A. Brykalov</i>	377	449
A Manifold of Ground-State Type Solutions of Semilinear Elliptic Equations <i>Yu. Sh. Il'yasov</i>	379	452
Approximation on Compact Symmetric Spaces of Rank One <i>S. S. Platonov</i>	382	455
The Paley Problem for Functions That Are Meromorphic in C^n <i>V. N. Khabibullin</i>	385	461
Anisotropy of Signals and Entropy of Linear Stationary Systems <i>I. G. Vladimirov, A. P. Kurdyukov, and A. V. Semenov</i>	388	583
Statistical Properties of Weighted Voting <i>Yu. A. Zuev and S. K. Ivanov</i>	391	586
Quasi-Potential Functions Associated with Orthogonal Polynomials <i>B. P. Osilenker</i>	394	589
Stochastic Differential Equations in Banach Spaces with a Basis <i>V. S. Pugachev</i>	397	592
Fractional Differentiation and Integration of Variable Order <i>S. G. Samko</i>	401	458
Blue Sky Catastrophes <i>D. V. Turaev and L. P. Shil'nikov</i>	404	596
An Algebra of Distributions and Generalized Solutions to Nonlinear Equations <i>V. M. Shelkovich</i>	408	600
Some Overdetermined Second Order Elliptic Systems and Boundary Value Problems in the Unit Ball of C^n <i>A. Dzhrumov</i>	411	727

Elliptic Equations with Discontinuous Nonlinearities <i>M. A. Krasnosel'skii and A. V. Pokrovskii</i>	415	731
Approximation of Functions on a Segment by the Spectral Resolution of the Schrödinger Operator <i>I. S. Lomov</i>	419	735
Estimate of the Variation of an Entire Function for the Shifts of Its Zeros <i>V. V. Napalkov and M. I. Solomeshch</i>	423	739
Asymptotics and Zeros of the Fourier-Stieltjes Transform of Cantor-Lebesgue Finite Measures <i>A. A. Ryabinin</i>	426	742
An Unsolvable Algorithmic Problem of Deterministic Push-Down Automata <i>L. I. Stanevichene</i>	428	744
Solvability in the Large of the Cauchy Problem for the System of Gas Dynamics <i>V. A. Tupchiev</i>	430	747

Mathematical Physics

Nonlinear Oldroyd Fluid <i>E. M. Turganbaev</i>	433	26
Formulas Connected with Problems of Tomography <i>Yu. E. Anikonov</i>	436	167
One-Dimensional Mappings of Eigen-Elements of the Schrödinger Problem <i>V. M. Eleonskii, V. G. Korolev, and N. E. Kulagin</i>	438	169
Algebraic Integrals and Adiabatic Invariants of the Kirchhoff Equations <i>S. T. Sadetov</i>	441	172
Wave Structures in Ring-Shaped Systems of Homogeneous Neuron Modules <i>S. A. Kashchenko and V. V. Maiorov</i>	444	318
Normal Frequencies of Modulated Waves in Porous Media <i>A. M. Maksimov, E. V. Radkevich, and I. Ya. Edel'man</i>	448	322
Energy Levels Corresponding to p -Adic Quantum States <i>R. Cianci and A. Yu. Khremnikov</i>	452	603

Informatics

Synthesis of Weight Windows on the Basis of Atomic Functions <i>Yu. V. Gulyaev, V. F. Kravchenko, and V. A. Rvachev</i>	456	29
Simulation of the Dynamics of Ion Exchange in the Case of Several Components with Different Diffusion Coefficients <i>N. A. Tikhonov, A. D. Poezd, and R. Kh. Khamizov</i>	459	464

Control Theory

Optimality Criteria for Positional Controls <i>L. T. Ashchepkov and N. I. Baranchikova</i>	463	175
Minimization of a Class of Functionals That Is Applicable to the Theory of Pulse Systems <i>E. N. Rozenvasser</i>	465	326
Robust Stable Structures of Automatic Systems <i>P. D. Krut'ko and G. A. Chkheidze</i>	468	607
Decision Problem in the Automated Design of Ultrafast Information Processing <i>I. I. Parfenov</i>	471	750

Volume 52, July - August

Mathematics

General Spectral Theory of Banach Modules

O. I. Guletskaya and N. Ya. Radyno 1 7

A Sufficient Condition for a Closed $(n - 1)$ -Dimensional Surface To be Homeomorphic to a Sphere

V. K. Ionin 4 10

The Problem of Canceling Enterprises' Mutual Debts

N. N. Kalitkin 6 12

An Algorithm That Is Polynomial on the Average in Integer Linear Programming

N. N. Kuzurin 9 15

Neumann Problems in Unbounded Domains

E. M. Landis and A. I. Ibragimov 11 17

New Problems for General Elliptic Systems on a Plane

M. M. Sirazhudinov 13 19

Convergence Criterion of the Residual Method

V. P. Tanana 16 22

Pseudoskeleton Approximations of Matrices

S. A. Goreinov, N. L. Zamarashkin, and E. E. Tyrtshnikov 18 151

The Multiparameter Trajectory Method for Solving Systems of Functional Equations

A. M. Lipanov 20 153

Regular and Nonregular Partially Invariant Solutions

L. V. Ovsyannikov 23 156

Existence and Properties of Solutions to Ordinary Differential Equations with Discontinuous Right-Hand Sides

V. V. Filippov 27 160

Spectral Analysis of Linear Differential Operators and Semigroups of Difference Operators

A. G. Baskakov 30 295

Deformations of Classic Lie Algebras of Characteristic Three

A. I. Kostrikin and M. I. Kuznetsov 33 299

Multivalued Semiflows and Their Attractors

V. S. Mel'nik 36 302

Unbiasedness and Variance of the Standard Estimate in the Monte Carlo Method

G. A. Mikhailov 40 306

Invariable Structures for Diffeomorphisms with an Ergodic Invariant Measure

V. A. Pliss and S. Yu. Pilyugin 43 312

The Borel Theorem for Infinitely Differentiable Functions from a Normed Space into a Banach Space

Ya. V. Radyno and S. A. Tuzik 45 309

On the Lattice Point Problem for Ellipsoids

V. Bentkus and F. Götze 48 439

Boundary Value Problems in a Unit Ball in \mathbb{C}^n

A. Dzhrayev 50 441

The Isomorphism of the Stable Representation and the Regular Representation of the Algebra of Functions on the Quantum Group		
<i>S. V. Kozyrev</i>	54	445
Generalized Correctness of the Cauchy Problem and Integrated Semigroups		
<i>I. V. Mel'nikova and M. A. Al'shanskii</i>	57	448
Estimation of a Global Error of A-Stable Methods for Solving Stiff Systems		
<i>E. A. Novikov</i>	61	452
Optimizing the Arrangement of Nodes in Latticed Cubature Formulas		
<i>M. D. Ramazanov</i>	64	456
Equivalent Conditions of Convergence of Series and Integrals for a Trigonometric System		
<i>P. L. Ul'yanov</i>	66	458
Calculus of Standard Quantor Formulas		
<i>S. N. Vasil'ev and A. K. Zherlov</i>	71	583
A Modified Stefan Problem as a Limit of the Asymptotics of a Phase Field System		
<i>V. G. Danilov, G. A. Omel'yanov, and E. V. Radkevich</i>	74	586
Criteria of Removable Sets for Weight Spaces $L^1_{p,\omega}$ and $FD^{p,\omega}$		
<i>I. N. Demshin and V. A. Shlyk</i>	78	590
Bernstein's Interpolational Polynomials		
<i>V. I. Zubov</i>	81	593
The Method of Additional Argument in the Theory of Nonlinear Wave Partial Differential Equations		
<i>M. I. Imanaliev, P. S. Pankov, and T. M. Imanaliev</i>	84	596
Approximation of Functions on a Segment by Biorthogonal Series That Are Connected with Second-Order Differential Operators		
<i>I. S. Lomov</i>	87	599
The Metric Space of the Riemann Surfaces over the Sphere		
<i>S. R. Nasyrov</i>	91	603
A Cauchy Problem for a Class of Systems with the Real Principal Part		
<i>L. R. Volevich</i>	95	727
Good Locally Global Fields		
<i>Yu. L. Ershov</i>	98	731
Random Real Algebraic Surfaces		
<i>I. A. Ibragimov and S. S. Podkorytov</i>	101	734
Optimal Control of Almost Periodic Motions with Constraints on the Averages		
<i>A. G. Ivanov</i>	104	737
Operator Equations for Generating Functions		
<i>L. Ya. Savel'ev</i>	107	740
Normalization in the Estimation of the Quality of Statistical Procedures		
<i>V. I. Serdobol'skii</i>	110	743

Mathematical Physics

Structural Formulas of the Solutions to Problems of the Diffraction of Elastic Waves		
<i>Yu. V. Gulyaev, V. F. Kravchenko, V. L. Rvachev, and N. D. Sizova</i>	113	163

Mathematical Modeling of the Heat Exchange
in a Two-Zone Source of Molecular Beam Epitaxy

M. Sh. Shavaliyev and V. P. Shapeev

116 166

The Green Function of a Laplace Operator
with Mixed Boundary Conditions on Isosceles Triangle

V. V. Dubrovskii, V. F. Kravchenko, and N. V. Syomin

120 314

Multiple Scattering of Electromagnetic Waves
in Nonlinear Stochastically Inhomogeneous Media

V. R. Kireitov, V. K. Mezentsev, G. I. Smirnov, and Yu. S. Chesnokov

123 317

The Investigation of the Mathematical Model of Thermoviscoelasticity

V. P. Orlov

125 320

Darboux Integrable Nonlinear Hyperbolic Equations

A. V. Zhiber, V. V. Sokolov, and S. Ya. Startsev

128 746

Informatics

A Method for Representing Coefficients of a Polynomial
of the Best Mean-Square Approximation

V. F. Kravchenko, V. D. Nagornyi, and V. I. Pustovoi

131 463

A Prime Number Generator for Devices for Noise-Resistant Transmission
of Information along a Radio Channel

V. A. Zhenikhov and A. A. Yashin

135 749

Control Theory

Roughness of Trajectories of Dynamical Systems
with Respect to Hysteresis Disturbances

P. Diamond, P. Kloeden, V. S. Kozyakin, M. A. Krasnosel'skii, and A. V. Pokrovskii

138 25

Higher Approximations in the Small Parameter Method for Weakly Controlled Systems

G. A. Kurina

141 28

New Conditions for Observability of Nonlinear Systems
for the Cases of Continuous and Discrete Observations

K. E. Starkov

146 33

$K_{\Delta}^{(0)}$ -Stability of the Linear Nonstationary Multi-Channel

Automatic Control System Synthesized on the Basis
of a Given Set of One-Channel Subsystems

K. A. Abgaryan

149 170

Universal Regulators in Invariance and Tracking Problems

V. A. Yakubovich

151 172

The Stochastic Problem of H_{∞} -Optimization

I. G. Vladimirov, A. P. Kurdyukov, and A. V. Semenov

155 607

Volume 52, September - October

Mathematics

Nonsaturating Iteration Methods for Solving Degenerate Nonlinear Operator Equations

A. B. Bakushinskii

159 7

The Infinitesimal Approach to the Representation
of Vector Lattices by Spaces of Continuous Functions
on a Compactum

E. Yu. Emel'yanov

161 9

A Conditional Function Limit Theorem
for a Critical Branching Process in a Random Medium

M. V. Kozlov

164 12

A Numerical Method for the Solution of Boundary Value Problems for an Equation
of the Elliptic Type with a Nonlinear Nonlocal Condition on a Part of the Boundary

A. G. Savel'ev and S. I. Fedorov

168 16

Exact Inequalities between the Norms of Second and Third Order Derivatives

O. A. Timoshin

172 20

Generalized Functionals of a p -Adic White Noise

A. Yu. Khrennikov and Huang Zhiyuan

175 23

A Method of Solving the Problem of Conjugation for Harmonic Functions

V. I. Vlasov and D. B. Volkov

179 151

Asymptotically Efficient Estimation of Functionals in a Gaussian White Noise

P. E. Greenwood and I. A. Ibragimov

183 155

Spectrum of a System of N Fermions as $N \rightarrow \infty$

V. V. Kucherenko and V. P. Maslov

186 158

Infinitesimal Rotational Transformations and Deformations of Surfaces in Euclidean Space

S. G. Leiko

190 162

Asymptotics for $t \rightarrow \infty$ of Solutions to the Generalized Korteweg-de Vries Equation

P. I. Naumkin and I. A. Shishmarev

193 165

Asymptotic Behavior of Solutions of One Class of Nonlinear Second-Order Differential Equations

M. M. Aripov and D. Sh. Eshmatov

197 295

Ways of Computing a Normal Form

A. D. Bryuno

200 298

Analytical-Numerical Method of Solving Poisson Equation in Complicated Domains

V. I. Vlasov and A. V. Rachkov

203 301

$W^{1,p}$ -Regularity of Almost Periodic Solutions of Nonlinear Parabolic Equations

K. Gröger and A. A. Pankov

207 305

A Boundary Value Problem for a Third-Order Equation

A. Ya. Lepin

210 309

Generalized Differential Equations: The Cauchy Problem and Periodic Solutions

V. V. Filippov

212 311

The Onsager-Machlup Functions for Gaussian Measures

V. I. Bogachev

216 439

An Approximated Functional Equation for $L(s, \chi_1)L(s, \chi_2)$

S. A. Gritsenko

219 442

Independence of Random Variables

V. I. Zubov

221 444

Localization and Construction of Cycles in Hopf's Bifurcation at Infinity

M. A. Krasnosel'skii, N. A. Kuznetsov, and M. G. Yumagulov

223 446

Surface Integrals in Linear Topological Spaces

A. V. Uglov

227 450

Homological Characterization of Type I Factors

A. Ya. Khelemskii

231 454

On the Exact Values of Widths of Classes of Functions in L_2 *G. G. Magaril-Il'yev and V. M. Tikhomirov*

234 583

Theorems Related to the Asymptotic Proximity of Fundamental Solutions to Parabolic Equations

F. O. Porper and S. D. Eidel'man

237 586

On the Numerical Solution of Nonlinear Equations

N. N. Redkovskii and V. A. Gureev

241 590

Moduli of Smoothness of Higher Orders Related to the Fourier-Jacobi Expansion and the Approximation of Functions by Algebraic Polynomials

Kh. P. Rustamov

244 593

Determination of the Source Function and the Parabolic Equation Coefficient

E. G. Savateev

248 597

On a Many-Dimensional Symmetry Principle

A. B. Sukhov

250 599

Theorems on the Representation of Spaces and Schur's Lemma

E. I. Bereznoi

252 727

Some Asymptotic Formulas for Elliptic Operators in R^n That Are Far from Self-Adjoint*K. Kh. Boimatov*

255 730

The de la Vallée-Poussin Series in the Spaces BMO , L_1 and $H^1(D)$, and Multiplicative Inequalities*S. V. Bochkarev*

260 736

On the Principle of Duality in Lorentz Spaces

M. L. Gol'dman, V. D. Stepanov, and H. P. Heinig

264 740

Differential Equations of Geometric Optics

L. V. Sabinin

268 745

Conditions for the Integrand That Are Necessary and Sufficient for the Validity of the Theorem on Convergence with a Functional

M. A. Sychev

271 749

Mathematical Physics

A Model of Compound Structure of Quarks, Leptons, and the Quanta of Interaction between Them

N. G. Marchuk

275 27

Electromagnetic Field Structure of a Magnetic Dipole on a Superconducting Thin Disk

V. F. Kravchenko, V. T. Erofeenko, and V. I. Pustovoit

278 168

Toward the Theory of Hamiltonian Systems with an External Action

Yu. A. Kriksin

282 172

An Investigation of the Diffraction of Elastic Waves on a Cone by the R-Functions Method

Yu. V. Gulyaev, V. F. Kravchenko, V. L. Rvachev, and N. D. Sizova

285 315

Oscillations in Systems of Equations with Delay and Difference Diffusion That Model Local Neuron Nets

S. A. Kashchenko, V. V. Maiorov, and M. L. Myachin

289 319

R-Functions Method in Research on the Diffraction of Elastic Waves on a Rigid Inclusion of Arbitrary Shape

Yu. V. Gulyaev, V. F. Kravchenko, V. L. Rvachev, and N. D. Sizova

293 457

A Connection between the Potential Matrix of the Dirac System and Its Wronskian <i>M. M. Malamud</i>	296	601
On the Shape Reconstruction of a Subsurface Defect in Half-Space <i>A. O. Vatul'yan and S. A. Korenskii</i>	300	753

Informatics

The Principle of Equilibrium Concordance in Information Theory <i>L. I. Khromov, A. B. Kovrigin, and A. V. Martynikhin</i>	303	30
Metric Spaces of Multisets <i>A. B. Petrovskii</i>	305	175

Control Theory

Estimating an Abrupt Perturbation of a Dynamical System and Identification of Its Parameters <i>I. A. Boguslavskii</i>	308	32
The Problem of Adjustable Perturbation and Some Algorithms of Its Solution <i>S. D. Zemlyakov and V. Yu. Rutkovskii</i>	312	460
Conditions of the Existence of an Attractor in the Form of a Quadric for Polynomial Dynamical Systems <i>A. A. Krasovskii</i>	315	463
The Sufficient Condition of Stability of Polynomial Cubic Dynamical Systems <i>A. A. Krasovskii</i>	317	605

Volume 52, November - December

Mathematics

A Regularizing Algorithm for Some Boundary Value-Problems of Linear Conjugation <i>V. G. Kravchenko and A. I. Migdal'skii</i>	319	-
Mathematical Simulation of Ethnic Processes <i>Yu. E. Anikonov</i>	322	7
On Lavrent'ev's Effect <i>V. V. Zhikov</i>	325	10
The Conjugacy of Cartan Subalgebras in n -Lie Algebras <i>Sh. M. Kasymov</i>	330	15
Necessary Conditions of Existence for Solutions to Some Nonlinear Spectral Problems <i>A. P. Makhmudov and M. M. Rasulov</i>	334	19
Laplace Transformation in an Algebra of Mnemofunctions <i>Ya. V. Radyno and A. B. Romashevskii</i>	337	22
Necessary and Sufficient Conditions for the Relative σ -Boundedness of Linear Operators <i>G. A. Sviridyuk, T. G. Sukacheva, and L. L. Dudko</i>	340	25
On the Basis Property of the System $\{e^{i\sigma_n x} \sin nx\}_1^\infty$ and a System of Exponentials with a Shift <i>B. T. Bilalov</i>	343	151
Toeplitz Operators with Discontinuous Presymbols in the Fock Space <i>N. Vasilevskii, V. Kisil', E. Ramires, and R. Trukhil'o</i>	345	153
Averaging of Nonlinear Variational Problems in Perforated Domains <i>V. V. Zhikov</i>	348	156
Conservative Methods for the Numerical Integration of Equations of Motion for Beams of Charged Particles <i>V. I. Zubov</i>	353	161

The Dirichlet Variational Problem for Degenerating Elliptic Equations in a Half-Space <i>S. A. Iskhokov</i>	356	164
A Comparison Principle for Quasilinear Elliptic Equations <i>V. V. Kurta</i>	360	168
On the Quasidifferential Equation Generated by a Continuous Chebyshev System <i>Yu. V. Pokornyi</i>	363	171
A Local Increase in the Smoothness of Generalized Solutions to Elliptic Boundary Value Problems in Nonsmooth Domains <i>B. Ya. Roitberg and Ya. A. Roitberg</i>	367	175
Asymptotics of the Spectrum of Degenerate-Elliptic Differential Operators That Are Far from Self-Adjoint <i>K. Kh. Boimatov</i>	371	295
On Some Nonlocal Problems for Linear Hyperbolic Systems <i>T. I. Kiguradze</i>	376	300
Fixed Points with Special Properties <i>M. A. Krasnosel'skii and A. V. Lusnikov</i>	379	303
On Asymptotic Behavior of the Best Approximations of Classes of Differentiable Functions by Algebraic Polynomials in Mean <i>V. P. Motornyi and O. V. Motornaya</i>	382	306
p -Adic Statistical Stabilization of Relative Frequencies <i>A. Yu. Khrennikov</i>	384	308
An Expression for the Volume of a Riemannian Manifold in Terms of the Distances between Boundary Points <i>V. A. Sharafutdinov</i>	388	312
Contact Problems for Parabolic Equations and Integral Equations <i>V. N. Sheveleva</i>	389	313
Integral Geometry for Differential Forms <i>A. Kh. Amirov and G. G. Gadzhisalikhoglu</i>	392	439
On Splitting the Inverse Problem for a Multidimensional Parabolic Equation <i>Yu. Ya. Belov</i>	394	441
Invariant Subspaces with Particular Properties <i>P. B. Gusyatinikov</i>	398	445
Stability of Bounded and Stationary Solutions to Linear Equations with Respect to Perturbations of Operator Coefficients <i>A. Ya. Dorogovtsev</i>	401	448
Linear Codes and Multilinear Recurrents over Finite Rings and Quasi-Frobenius Modules <i>A. A. Nechaev</i>	404	451
Smooth Measures on Loop Groups <i>O. G. Smolyanov</i>	408	455
The Behavior of a Solution to Parabolic Second-Order Equations in Noneylindrical Domains <i>Yu. A. Alkhutov</i>	412	583
The Cauchy Initial Value Problem on Different Surfaces <i>S. P. Bautin</i>	415	586
Bifurcations of Solutions in an Invertible System of Ordinary Differential Equations <i>A. D. Bryuno and A. Soleev</i>	419	590
On Approximation of Topological Groups and Their Representations <i>E. I. Gordon</i>	422	593

On the Stability of Classes of Quasiregular Mappings of Several Space Variables <i>N. S. Dairbekov</i>	425	596
Commutants of a Differentiation Operator on Principal Submodules <i>V. V. Napalkov and A. V. Komarov</i>	428	599
Minimax Procedures of Statistical Estimation in Hilbert Spaces <i>A. V. Borisov and A. R. Pankov</i>	430	727
A Class of Fourth-Order Differential Equations on a Spatial Net <i>A. V. Borovskikh, R. Mustafokulov, K. P. Lazarev, and Yu. V. Pokornyi</i>	433	730
Well-Defined Solvability of a Class of Functional-Differential Equations in a Hilbert Space <i>V. V. Vlasov</i>	436	733
Isomorphisms of Quasigeodesic Flows and Their Invariants <i>V. A. Igoshin</i>	440	737
On Double Waves of Equations with Three Independent Variables <i>S. V. Meleshko</i>	443	740

Mathematical Physics

Asymptotics of a Spatially Periodic Solution to Boussinesq's Equation with Dissipation for Large Time <i>V. V. Varlamov</i>	446	459
Forming an Acoustic Halo-Type Field <i>V. P. Ivanov</i>	450	601
Similarity Conditions of Processes in Systems of Interacting Particles <i>G. I. Marchuk, I. B. Pogoshev, and S. M. Zuev</i>	454	605
Asymptotic Solutions to the Hartree Equation Localized in a Small Neighborhood of a Curve as $h \rightarrow 0$ <i>S. A. Vakulenko, V. P. Maslov, I. A. Molotkov, and A. I. Shafarevich</i>	456	743
Bistability and Cycles in the Population Dynamics of Systems with Multiplicative Noise <i>G. A. Lyakhov and S. L. Popyrin</i>	459	746

Informatics

A Mathematical Model for a Universal Element of an Active Medium <i>A. D. Bazykin[†] and F. S. Berezovskaya</i>	462	28
Methods of Synthesizing Diophantine Neuronets of Minimal Complexity <i>A. V. Timofeev</i>	466	32
Computational Study of a Linear Convolution of Criteria in Discrete Multicriteria Programming <i>I. I. Melamed and I. Kh. Sigal</i>	469	463
Decision-Making with Incomplete Information <i>S. Benedikt</i>	473	749

Control Theory

A Contribution to the Constructive Theory of Optimum Observation of Dynamic Systems <i>R. F. Gabasov and F. M. Kirillova</i>	476	316
